

# MODEL SC-8 SEMI-AUTOMATIC CASSETTE AND BOX CLEANING SYSTEM

## OVERVIEW

The Hugel SC-8 is the solution you need to clean all types of wafer carriers and boxes up to 8" in a single system.

The SC-8 is a new generation semi-automatic cassette and box cleaning system. This model features energy efficient, space saving, trouble free design. Special water and air nozzles wash and dry containers as they are transported through the system in wire trays. Hugel has built on the strong performance and reliable design of the earlier CRD-4500. There are also design improvements that increase drying efficiency and reduce system cost. Cost savings have resulted in substantial price reductions.
